SOFTWARE ENGINEERING POSITION
in Cincinnati, OH

Job Description

We are looking for skilled, motivated, and talented people to join our growing team to push the limits of the latest technology and create novel solutions with real-world applications.

The Software Engineer is expected to:

Work closely with algorithm and hardware teams to develop wireless communications and signal processing solutions. Develop software solutions for a variety of platforms and functionality. Require an ability to code complex algorithms into a software-based solution. Support firmware and RF teams with verification and bringing-up of prototypes. The ideal candidate should also exhibit the following: problem-solving skills, attention to detail, strong interpersonal written and verbal communication skills, and the ability to work in a dynamic and team-oriented environment.

Qualifications

Minimum Requirements:

- *****US citizenship is required*****
- BS or MS in Electrical or Computer Engineering (or related field) with 3+ years of experience in embedded software design and implementation
- Experience with C/C++ and/or other simulation and modeling tools/languages
- Experience with Linux/Unix operating systems.

Company Description

GIRD Systems, Inc., is a rapidly-growing Cincinnati-based company that specializes in cutting-edge research and development and is a leader in signal processing, RF/digital wireless communications, RADAR, EW, geolocation and navigation, and software defined radio. We design, develop and deliver mission-focused technological solutions and software/hardware products, leveraging the state-of-the-art in software, FPGA/ASIC, digital hardware and RF engineering, system engineering and system integration, toward bringing our signal processing and communications innovations to life. These solutions address critical needs in software defined radio, tactical radio, mission operations and open processing architectures. Our work includes solving some of the most difficult problems facing U.S. Government agencies as well as commercial customers and developing products to meet our customers' needs. Please visit our website at www.girdsystems.com for details.

Our success is a product of our exceptional engineering team and our culture focuses on driving innovation and rewarding excellence. We seek highly motivated, innovative and forward-thinking individuals to grow with the company.

GIRD Systems provides our employees with competitive compensation packages and a full range of benefits, including vacation/holiday, medical, dental, IRA match and tuition assistance. We have a casual working environment with flexible working hours and a culture that emphasizes innovation, teamwork, agility, process and quality. Being a small company, our employees have the opportunity to participate on a variety of projects and make an immediate impact to the success of the project and the company. Our employees are paid overtime for working over 40 hours when needed and all health insurance premiums are paid. We offer a generous profit-sharing plan and encourage employees to bring new product ideas for consideration, not to mention free snacks in the kitchen. Our employees are the key to our success and we seek to hire only the best.

GIRD Systems is committed to hiring and retaining a diverse workforce. We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, age, religion, sex, national origin, disability status, protected veteran status or any other characteristic protected by law.
